

Session Program

20–24 Jan 2020

58. International Winter Meeting on Nuclear Physics

Thursday Afternoon

Bormio, Italy

Thursday 23 January

17:00

Thursday Afternoon

Session | Location: Bormio, Italy

17:00–17:20 **Systematic studies of beam-normal single-spin asymmetries at MAMI**

Speaker

Michaela Thiel

17:20–17:40 **Design and performance of KISS read-out-electronics in HADES**

Speaker

Adrian Rost

17:40–18:00 **Coherent pion photoproduction on spin-zero nuclei**

Speaker

Viacheslav Tsaran

18:00–18:20 **The BEC-BCS crossover and the Dirac spectrum in QCD at nonzero isospin asymmetry**

Speaker

Dr Francesca Cuteri

18:20–18:40

Advances towards a direct measurement of the gravitational interaction on antimatter with the AEGIS experiment

Speaker

Dr Davide Pagano

18:40–19:00 **Recent results on XYZ states with the BESIII experiment**

Speaker

Dr Nils Hüsken

19:45
