

53. International Winter Meeting on Nuclear Physics

Thursday, 29 January 2015

Thursday Afternoon (17:00 - 19:20)

time	[id] title	presenter
17:00	[25] Measurements of W boson production in p-Pb collisions at the LHC with ALICE	Mr SENOSI, Kgotlaesele Johnson
17:20	[13] Quasi-Free Scattering from Relativistic Carbon and Oxygen Isotopes	Mr HOLL, Matthias
17:40	[23] Hadrons with c-s quark content: past, present and future	Dr PRENCIPE, Elisabetta
18:00	[31] EndoTOFPET-US: an endoscopic Positron Emission Tomography detector for a novel multimodal medical imaging tool	Mr CORTINOVIS, Daniele
18:20	[35] Hadronic decays of the omega meson measured with WASA-at-COSY	Ms HEIJKENSKJÖLD, Lena
18:40	[46] Recent Results on Hard Probes of the Quark-Gluon Plasma with the ATLAS Experiment at the LHC	Dr KOSEK, Tomas
