

## **Session Program**

19–23 Jan 2026

**62<sup>nd</sup> International Winter Meeting  
on Nuclear Physics**

19 - 23 January 2026  
Bormio, Italy

## **Bormio Conference 2026**

### ***Friday Afternoon***

Bormio, Italy

# Friday 23 January

17:00

## Friday Afternoon

Session | Location: Bormio, Italy

**17:00–17:30** Have we found  $\eta'$ -mesic states

### Speakers

Mariana Nanova, Volker Metag

**17:30–17:48** Prior uncertainties in inferring neutron star masses and radii from observations

### Speaker

Prof. James Lattimer

**17:48–18:06** Latest Results from CUORE and Progress towards CUPID

### Speaker

Kangkang Zhao

**18:06–18:24** Search for „Standard Model forbidden“ components of weak interactions

### Speaker

Dalibor Zakoucky

**18:24–18:42** Predictions for charged-hadron production in p-O collisions at LHC energies

### Speaker

Georg Wolschin

**18:42–18:47** Closing remarks

19:00
