

Session Program

4–8 May 2026

Electroweak Corrections at Current and Future Accelerators

Determination of pseudo-observables at e^+e^- colliders

Mainz Institute for Theoretical Physics, Johannes Gutenberg University, 02.430
Staudingerweg 9 / 2nd floor, 55128 Mainz

Tuesday 5 May

09:30

Determination of pseudo-observables at e+e- colliders

Session |

Location: Mainz Institute for Theoretical Physics, Johannes Gutenberg University, 02.430, Staudingerweg 9 / 2nd floor, 55128 Mainz

Convener: Ayres Freitas

09:30–10:00 **Future e+e- colliders: Overview of envisioned measurements and precision goals**

Speaker

Christophe Grojean

10:30

10:05–10:30 **Discussion**

11:00

Determination of pseudo-observables at e+e- colliders

Session |

Location: Mainz Institute for Theoretical Physics, Johannes Gutenberg University, 02.430, Staudingerweg 9 / 2nd floor, 55128 Mainz

Convener: Ayres Freitas

11:00–11:30 **Theory needs for extracting POs from e+e- data**

Speaker

Fulvio Piccinini

12:00

11:35–12:00 **Discussion**

14:00

Determination of pseudo-observables at e+e- colliders

Session |

Location: Mainz Institute for Theoretical Physics, Johannes Gutenberg University, 02.430, Staudingerweg 9 / 2nd floor, 55128 Mainz

Convener: Doreen Wackerath

14:00–14:15 **WW at threshold**

Speaker

Juergen Reuter

14:20–14:35 **QED factorization and resummation/showering**

Speaker

Alan Price

14:40–14:55 **Impact of PDFs on DY and MW**

Speaker

Prof. Maarten Boonekamp

15:00

15:30

Determination of pseudo-observables at e+e- colliders

Session |

Location: Mainz Institute for Theoretical Physics, Johannes Gutenberg University, 02.430, Staudingerweg 9 / 2nd floor, 55128 Mainz

Convener: Doreen Wackerath

15:30–16:30 **Discussion**

16:30
