

FPGA Workshop

Tuesday, October 6, 2015 - Thursday, October 8, 2015

Location: Elektronikpraktikum

Scientific Program

This 2.5-day workshop is aiming at PhD students and interested PostDocs (participation is subject to availability) who want to gain first experience with FPGA (Field Programmable Gate Array) programming.

There are no requirements nor is previous knowledge required.

The workshop foresees lectures and laboratory sessions on modern FPGA evaluation boards. You will be able to work in small groups of two people and run practical projects.

Please note that there is a limited number of places.
