

55. International Winter Meeting on Nuclear Physics

Monday, 23 January 2017

Monday Afternoon (17:00 - 19:20)

time	[id] title	presenter
17:03	[24] Silicon Tracking System of the future CBM experiment at FAIR	Dr TEKLIŠHYN, Maksym
17:06	[1] Timing in a FLASH	Dr HOEK, Matthias
17:12	[31] The upgrade of the ALICE Inner Tracking System	Dr RAVASENGA, Ivan
17:15	[5] Study of corrections to the eikonal approximation	Ms HEBBORN, Chloë
17:18	[28] New strategies of the LHC experiments to meet the computing requirements of the HL-LHC era	Dr ADAMOVA, Dagmar
17:21	[9] K^* resonance dynamics in heavy-ion collisions	ILNER, Andrej
17:27	[8] Backbending in the pear shaped ^{223}Th nucleus : First evidence of a high spin octupole to quadrupole shape transition in the actinides.	Mr MAQUART, Guillaume
17:30	[76] Coherent π^0 photoproduction on spin-zero nuclei	Dr TSARAN, Slava
17:40	[63] Poster Discussion
